FLUORSID

THE PROJECT

FLUORSID, worldwide leader in manufacturing and sales of inorganic fluorochemicals, has embraced this project by putting in place the most modern technologies and improving processes in order to be able to offer a totally Made in Italy product, available both nationally and internationally.

March 2020, the RMT Shield idea was born in Italy, during the health emergency, to quickly address the lack of PPE in environments with a high risk of infection.

This path was taken with the primary objective of protecting FLUORSID workers and providing reliable support to all the communities that insist in the territories where the company operates.

It is now available to the community, it is for all those who wish to use it. Quality, effectiveness and customization are the cornerstones.

Developed on the field thanks to the active collaboration with doctors, health professionals and the Scientific Police, the project has undergone several releases aimed to improve its effectiveness and wearability.

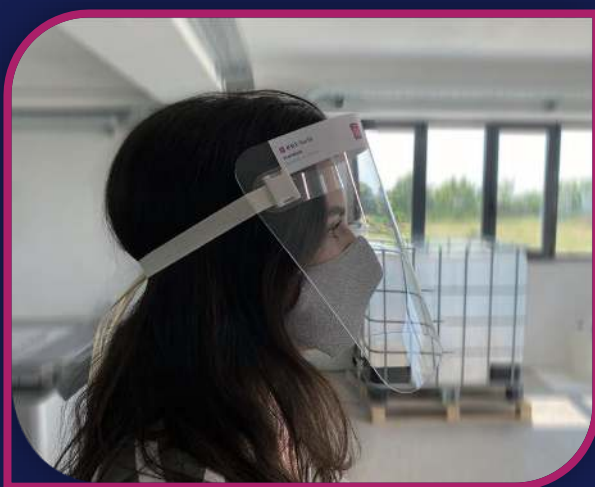

MAIN FEATURES

RMT Shield is CE APPROVED. It is firmly wearable both directly on the skin and on an headset and it can also be used wearing glasses and filter masks thanks to the space between the device and the face.

The 0.75 mm thick polycarbonate surface offers a high safety standard against contamination, impacts, scratches and guarantees full peripheral visibility thanks to a limited light distortion.

The absence of porous materials such as foam rubber or expanded foams allows to avoid the accumulation of humidity, a vehicle of contagion, and offer the possibility to completely sanitize the product, ensuring effective protection even after numerous uses.

Moreover its shape allows, in total safety, great lateral mobility preventing contact with the shoulders up to an angle of 115 °.

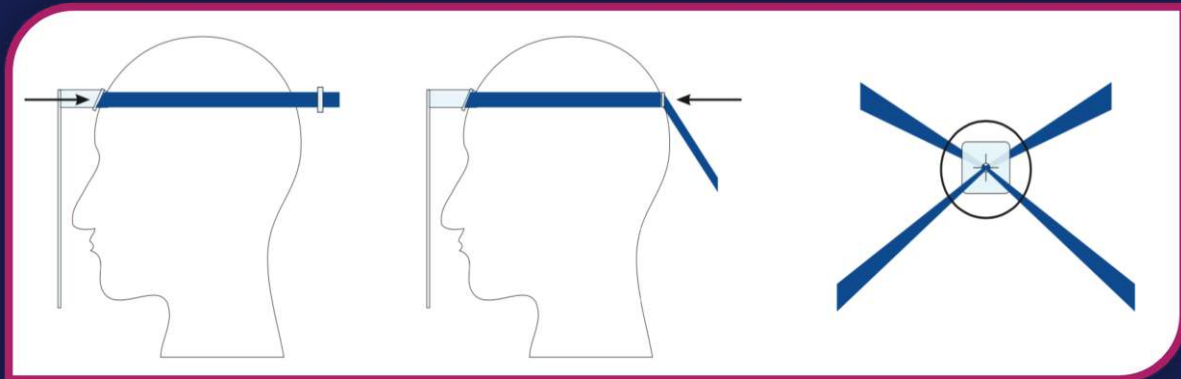

USE OF THE DEVICE

01 Wear RMT on the forehead

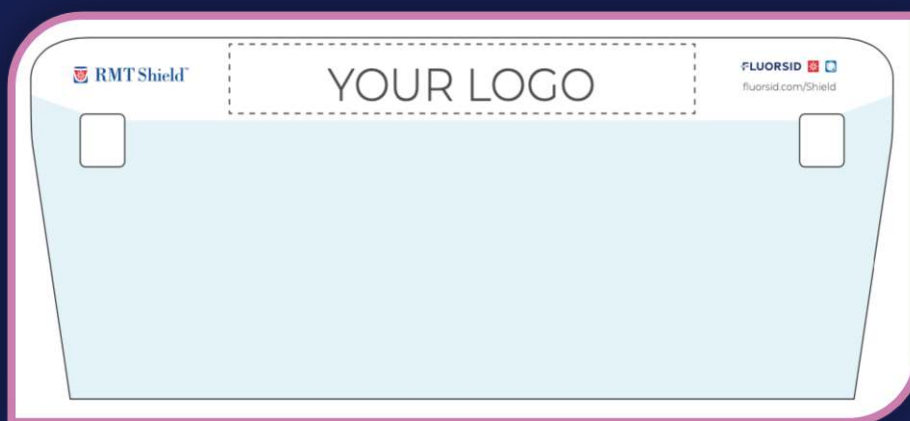

02 Tighten by advancing the stopper

03 Adjust the tightness without knotting

CUSTOMIZATION

RMT Shield is designed, produced and assembled entirely in Italy in the FLUORSID ICIB plant of Treviglio (BG). The graphic design can be customized upon request ordering at least 500 units.

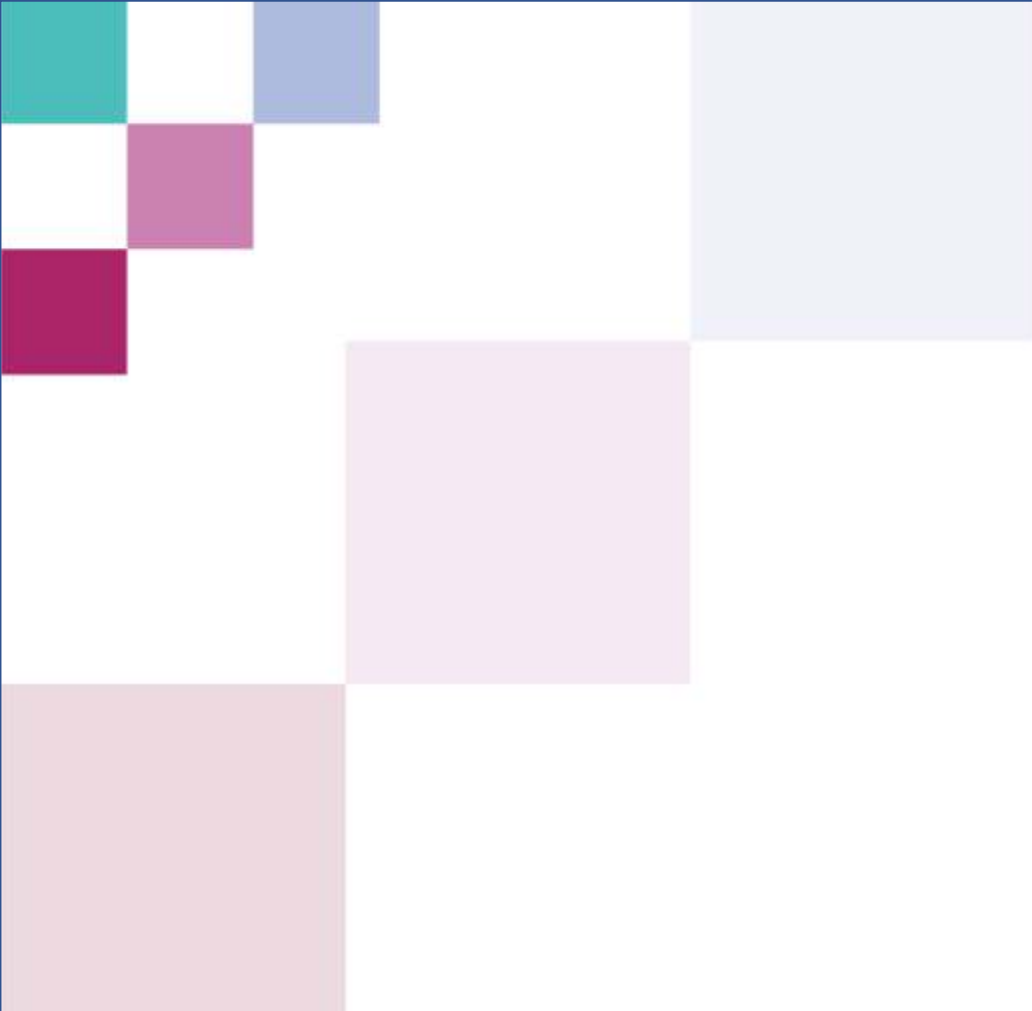

RMT Shield™ is produced by **FLUORSID**

In collaboration with

Rimeta
NAUTICAL COMMUNICATION

and **newco logistic**
